

Look, we live in a county that has a free market system and competition is one of the major keys to its success. This bill put forth by the National Association of Broadcasters attempts to "cheat the system" by using legislation to protect their poor/old/tired business model.

The National Association of Broadcasters can do one simple thing to help them adapt to this new business climate: INNOVATE!!! IMPROVE YOUR PRODUCT!!!

Please reject the NAB's petition 04-160.

Thank you.
